

Carrie Harmon graduated with an Associate's Degree in Accounting from Marion Technical College (MTC) in 1997. She became the first student to graduate from high school and from MTC at the same time. After an additional year of college, she graduated with an Associate's Degree in Retail Management and Marketing from MTC. Carrie went back to college after 20 years and graduated in December 2017 with a Bachelor's Degree in Business Management from The University of Findlay.

She began her career in the office supply industry, working for 15 years at Friends Business Source. She was the administrative assistant for 20+ sales representatives. During her time with Friends she was also the Printing Coordinator for 8 years. Her final role was the executive administrative assistant to the Chief Operating Officer along with being the Training Specialist to employees and customers. The skills she learned during those years along with her educational background helped her obtain a job at Marathon Petroleum Corporation. She has been with the company almost five years, spending the first two years in the Business Development organization. She is currently a Senior Processor in the Supply, Distribution and Planning organization. She was been a member of the United Way Committee for four years and was a member of the social committee for the Extended Onboarding group.

Carrie realized in her early days at Marathon that the energy industry was vastly different from the office supply industry. Although she was in an organization that worked with many departments, the terminology and information that was being discussed was hard to understand without the background knowledge. She started attending lunch and learns presented by Buckeye Desk and Derrick. In 2014, she became a member and was encouraged to attend Convention that year in Lafayette, LA. She will tell you that she was instantly hooked and became even more involved with the club upon her return. In 2015, she became Buckeye's Vice President. In 2016, she started the year as Vice President and in May was named President after the current president stepped down. She continued in 2017 as the President and was elected to be the 2018 Region I Director.

She looks forward to many more years and opportunities with ADDC.
